Hilal Mahallesi 677. Cadde No 9 Yıldız - Çankaya - Ankara - TURKEY

Vehicular Jammer Systems are designed and produced by ATEL engineers to provide effective protection against threats generated by RC-IEDs targeting VIPs and convoys.

The system is field proven to be the best operating vehicular jamming system in desert and harsh climatic environments thanks to its high technology and genuine design.

The system provides reliability and programmability through its DDS (Direct Digital Synthesis) technology.

The system enables Commanders to sustain the command and control capability which is essential for the success of the mission via communication channels to be notched.

The user friendly LCD touchscreen control unit allows the operator to test, restart or re-program the system on-the-go.

The vehicle is completely shielded to protect the personnel from the harmful effects of the electromagnetic radiation.

- Efficient jamming: 360° bubble protection • Module Selection
- Selectable and Adjustable Output Power • Built-in Self-Test
- VSWR Protection • Vibration and Shock Protection • SAR Protection – EMI Shielding

## Technical Specifications

<b>Frequency Range</b>	: Up to 6000 MHz (please ask for other frequency coverage options)
<b>Jamming Type</b>	: Programmable Full Band Sweeping – Direct Digital Synthesis
<b>Environmental Conditions:</b>	MIL-STD-810 F/G
<b>Operation Period</b>	: 7/24
<b>Power</b>	: Alternator, additional alternator or battery pack
